

FA205S-MD PERSONAL DURESS PENDANT with MAN-DOWN DETECTION

The FA205S-MD wireless man-down duress pendant comes equipped with a belt loop clip. Internal circuitry detects when the pendant has tilted beyond 60 degrees at which time it will beep audibly for 5 to 30 seconds (factory preset). If the pendant is not restored to an upright position in that time, the pendant will transmit a man-down alarm. It is also available in a two button version shown right. Pressing of both buttons is required to activate the alarm. The long life Lithium battery is a commonly available item and is replaceable by the end user. The pendant is fully supervised for both operational readiness and low battery conditions. True-line-of-site range is approximately 2500 feet but will be less indoors.

FA205S-MD Specifications:

Dimensions: 3"h x 1.6"w x 1"d
Weight: 2.7 oz.
Battery: 3.0 volt Lithium
RF Power: 10 milliwatts

Typical battery life: 3 to 5 years
Operating range: 32 deg. to 140 deg. F and up
to 95% relative humidity
(non-condensing)
